

Le tableau ci-après donne un aperçu des calibres de chaînes et des masses de corps-morts pour des cas courants en conditions de site non exceptionnelles.

Ce tableau n'est pas un outil de dimensionnement, mais est simplement destiné à fixer les ordres de grandeurs usuels.

Merci de nous contacter pour choisir l'ancrage le plus approprié.

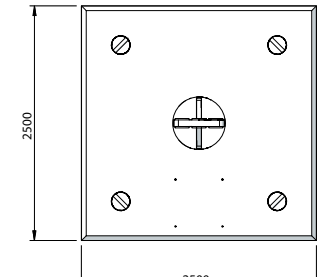

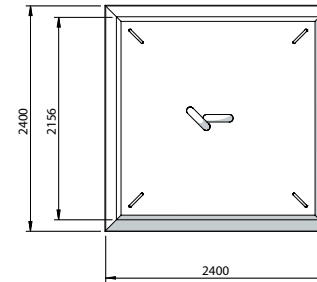

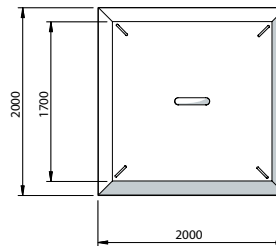

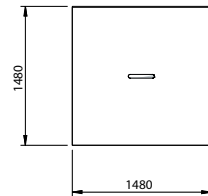

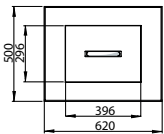

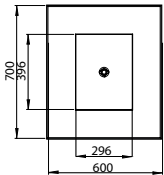

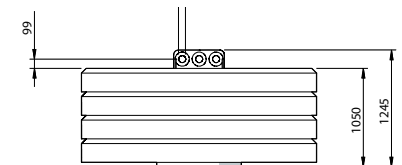

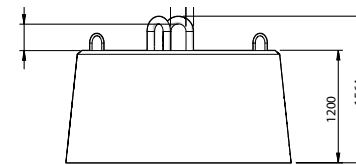

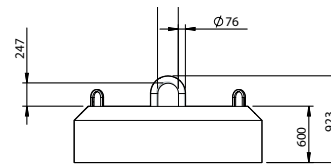

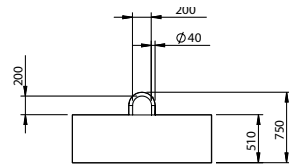

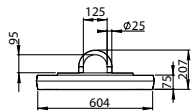

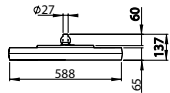

SPÉCIFICATIONS

Masse des bouées (kg)	Calibre de chaîne	Masse du corps-mort (kg)
<200	12 à 16	<200
200 à 500	14 à 20	200 à 800
500 à 1000	16 à 25	300 à 1200
1000 à 2000	20 à 30	500 à 2000
2000 à 4000	25 à 35	1000 à 3000
4000 à 10000	30 à 35	2000 à 5000

Les photos et illustrations publiées sont non contractuelles.

The board below gives an outline of the calibres of chains and the masses of moorings for current cases in not exceptional conditions of site.

This board is not a tool of sizing, but is simply intended to fix the usual orders of height.

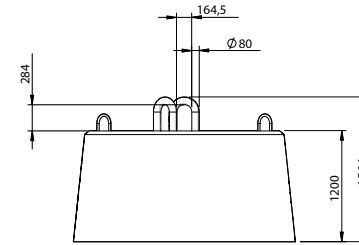

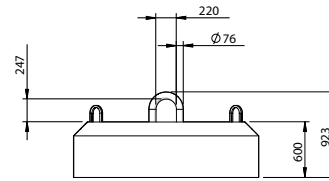

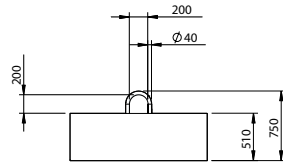

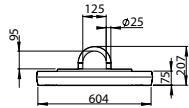

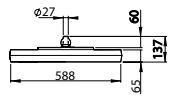

Please refer to Mobilis engineering department to choose the most effective one.
